EDUCATION

When using FunFloor Interactive Floor, children engage all their senses, which combined with movement, makes the FunFloor teaching method extremely effective and attractive. Specially designed games enhance learning, build curiosity and develop children's desire to discover. While playing and performing tasks on FunFloor Interactive Floor children take great joy in learning.

THERAPY

Play therapy helps to release energy but also thanks to engaging games patients forget about their limitations and focus on the joy of having fun. Overcoming barriers and opening up to the therapist and other participants is extremely motivating and essential in therapy. Therapy which applies Interactive FunFloor is brings a lot of joy to both patients and therapists.

SENIOR

With Interactive Floor FunFloor seniors enter the world in which they can escape their limitations and enjoy their therapy time. FunFloor activities will enhance their cognitive abilities, motor coordination as well as their concentration. Additionally, Interactive FunFloor keeps players motivated and helps them to integrate as they play together. Interactive FunFloor can be used by both non-disabled as well as disabled seniors.

FunFloor

SPORT

Healthy body, healthy mind – as people commonly say. We also do believe in that saying as we care about promoting healthy lifestyle. For this reason SPORT package was designed. It includes games and animations for sport enthusiasts which develop observation, movement coordination and spatial orientation. We want to encourage everyone to keep fit and ensure that physical activity will become great fun and pleasure.

PLAY

For a child, play is a natural way of gaining experience and getting to know the world. We do understand and respect that. That is why the games have been designed in such a way so that they suit everyone. Interactive FunFloor allows you to play football matches or have fun playing in the sandbox all year round regardless of the weather. Wide range of theme games guarantee children won't get bored.

EVENT

Interactive FunFloor is frequently used as a marketing tool. It enables to literally enter the picture and directly contact the displayed advertising content. It is an excellent form of presenting your company offer at trade fairs, business events as well as promotional campaigns. The competitions held on the FunFloor Interactive Flooring usually attract crowds of visitors to the stand. Potential customers will gladly escape from traditional forms of advertising and rather see games and animations on the displayed image. Thanks to this, the brand name presented on the Interactive Floor stays remembered for longer.

Additional remote control

GAME PACKAGES

GAME PACKAGES

SPEECH THERAPY PACKAGE

The Speech Therapy Package includes 15 speech therapy exercises. The games have been designed in such a way so that the child can acquire the ability to speak correctly while playing. Our animations are accompanied by a voice actor, thanks to which the games develop articulation awareness and influence the training of phonemic and phonetic hearing. The Speech Therapy Package allows you to correct speech impediments in a pleasant and interesting way, which is why our animations are the perfect complement to the therapy in the specialist's clinic.

15
games

SPORT PACKAGE

Sport Package consists of 15 exercises that encourage physical activity. Interesting graphics and animations make the training process more diverse. The games designed by FunFloor attract attention, engage and effectively motivate people to take up more effort. The Sport Package is an interactive game that is a great treat during sports events, PE classes or workout at the gym.

REVALIDATION AND THERAPY PACKAGE

Revalidation and Therapy Package is a set of interactive activities which improve dysfunction treatment as well as perception development. At the same time, it supports attention span based on the visual-kinesthetic analyzer. As it is developed on the basis of scientific research, knowledge and personal experience, Revalidation and Therapy Package becomes a unique and substantive help in therapeutic work with children suffering from developmental deficits. It will facilitate teachers' work greatly if they can make classes more attractive e.g. by arousing children's curiosity, building new skills on children's current knowledge, or using gradual transition to a higher level.

20
games

HANDWRITING SKILLS PACKAGE

Handwriting Skills Package combines great fun with study. Pupils make quicker progress in writing skills. The games have been specially designed in order to simultaneously support the development of fine motor skills (i.e. appropriate development of hand dexterity) and eye-hand coordination (i.e. hand-eye cooperation). Interactive pens help them to learn how to write, colour pictures, match relevant elements and point out correct words. This package can be used with highest-level kindergarten groups as well as with first graders.

28
quizzes

ELEMENTARY SCHOOL PACKAGE

Elementary School Package includes quizzes which are excellent additional resources for teaching in primary schools. Students can consolidate their knowledge in an interesting and unconventional way. First children read the quiz question and possible answers, next they select the correct answer.

GAME PACKAGES

BABY FIRST PACKAGE

Baby First Package has been created in cooperation with American television Baby First TV. The games are aimed mainly at the youngest audience. The Baby First TV package includes 6 games that introduce babies to the world of sounds and colours. Those games develop hand-eye coordination as well as children's perceptiveness and are great options for playtime especially in nurseries, preschools and play centres.

6
games

BRAIN DEVELOPMENT PACKAGE

Brain Development Package develops children's imagination and motor coordination and teaches them self-control. Moreover, it actively improves their concentration span. Child's mind is very receptive and infallible, and its memory develops dynamically. Brain Development Package aims to help in play-centred learning. The FunFloor games not only promote friendly competition, but most of all they actively influence the development of imagination and those cognitive elements which are the most important for the proper child development.

12
games

CODING PACKAGE

Coding Package is a perfect introduction into computer programming. Available in 3 options - kindergarten, grades 1-3, grades 4-8 - with suitable difficulty level. Each package includes 10 games which develop critical thinking and mathematical skills, as well as increase ability to memorise and concentrate.
